

A diagram illustrating a file path transformation. At the bottom is a white box containing the source path: `/home/travis/build
/bender-wardrobe/Recast
/src/core/io/network/listeners
/CastSpell.cpp`. A blue arrow points upwards from this box to a gray box above it. The gray box contains the transformed path: `/home/travis/build
/bender-wardrobe/Recast
/src/headers/io/network
/listeners/CastSpell.h`. The transformation appears to be a combination of directory restructuring (removing 'core' and adding 'headers') and file extension change (from .cpp to .h).

```
/home/travis/build  
/bender-wardrobe/Recast  
/src/headers/io/network  
/listeners/CastSpell.h
```

```
/home/travis/build  
/bender-wardrobe/Recast  
/src/core/io/network/listeners  
/CastSpell.cpp
```
