

A diagram illustrating a file path transformation. A blue arrow points from a source directory box at the bottom to a build directory box at the top. The source box contains the path components: /home/travis/build, /glitchless/Recast/src, /temperature-world/implementation, and /BasicTimer.cpp. The build box contains the transformed path components: /home/travis/build, /glitchless/Recast/src, /headers/temperature-world, and /implementation/BasicTimer.hpp.

```
graph BT; A["/home/travis/build<br/>/glitchless/Recast/src<br/>/temperature-world/implementation<br/>/BasicTimer.cpp"] --> B["/home/travis/build<br/>/glitchless/Recast/src<br/>/headers/temperature-world<br/>/implementation/BasicTimer.hpp"]
```

/home/travis/build
/glitchless/Recast/src
/headers/temperature-world
/implementation/BasicTimer.hpp

/home/travis/build
/glitchless/Recast/src
/temperature-world/implementation
/BasicTimer.cpp
